

BRITE4ADD

The Smart Vender allows us to up-cycle old, existing vending machines and to integrate technology with a quick and straight forward installation. The software enables full access control remotely, minimizing physical interaction for the vendor.

BENEFITS

A PERSONALIZED TURNKEY SERVICE

- Interact with a sole vendor (machine creation, payment method, software)
- Personalize your software
- Update your information remotely (prices, texts, images, video)
- Customize your vending machines with touchscreen technology

SIMPLICITY

- Manage inventory with a notification system
- Receive pre-filled order forms
- Install your machine in one simple step

PAYMENT METHOD

- Collect your transactions between 24-48 hours
 - Operate with a competitive transaction rate
 - Credit, debit, mobile and RFID
- 

SALES BOOSTER

- Collect data about customers and know their preferences
- Use promotional codes to drive sales and create a buzz around your product
- Multiply your sales by offering a cart option for easy self check-out

WHAT WE OFFER

We disrupt the vending machines market by offering a customizable solution that companies can adjust to their specific needs. By using a 10" touchscreen, Brite4 redefines the interaction between human beings and machines by making it more innovative and more interactive for the user.

Thanks to the Internet of Things, our machines enable companies to optimize their operations and be more profitable.
