

Automated solution for meal management in Senior Houses

AUTOMATION AND SIMPLIFICATION OF OPERATIONS

Brite4Nutrition is a solution for automating food operations in short and long-term care facilities in order to reduce staff workload. This is made up of an interactive kiosk facilitating order taking directly by the user (resident, patient, caregiver, etc.), connected to software allowing the management of the menus displayed and to which managers have access for planning meals.

TURNKEY PRODUCT

- Interactive kiosk with a 20-inch touch screen for meal selection
- Tablet (or mobile) version to offer an option for patients with reduced mobility.
- Management of patient restrictions using a QR or RFID code
- Integrated printer for kitchen orders
- Payment terminal for guests who want a meal
- Confirmation sent by email

MANAGEMENT SOFTWARE

- Creation of the meals database (images/description/prices)
- Display of meals available for the week
- Management of sales and inventory available by meal

BENEFIT FOR THE ESTABLISHMENT

- Forecast of the number of meals to prepare
- Reduction of food losses
- Reduced staff workload

OPTIMIZE YOUR OPERATIONS WITH CUSTOMIZABLE SELF-SERVICESOLUTIONS

Brite4 designs and markets self-service solutions to automate and improve the user experience. Our self-service expertise allows us to offer a 360 degree service, integrating design, software and operator experience.
